EDUCATION

The Ghana-India Kofi Annan Centre of Excellence in ICT (AITI-KACE)
Business Computing

Accra, Ghana
June 2017 - July 2018

WORK EXPERIENCE

Accede Ghana
Software Engineer

Accra, Ghana
January 2020 - Present

- Led frontend development across sectors including fintech, legal tech, edtech, health, and residential community management. Delivered scalable and user-focused interfaces using Angular and ReactJS.
- Collaborated with UI/UX designers to translate designs into functional components, emphasizing responsiveness, accessibility, and performance optimization across devices.
- Built and maintained admin control features for platforms ensuring efficient user management and operational workflows.
- Integrated secure technologies such as Single Sign-On (SSO) and WebRTC, enabling real-time communication and streamlined authentication flows. Worked closely with backend teams to implement and consume secure APIs, enforcing best practices in data protection and platform security.
- Applied industry best practices in security, cross-platform optimization, and DevOps, leveraging tools like Azure, Firebase, Git, and Netlify to support efficient deployment and platform reliability.

SKILLS

Programming Languages: SQL, JavaScript, Typescript, C#
Frameworks: React/Next Js, Angular, ASP.NET
Other Technical Skills: Azure, Firebase, Git, GitHub, GitLab, Netlify, REST - API

PROJECTS

IMS Angular, ASP.NET Core (Typescript, C#) <https://github.com/NiiAnyetei/InstallmentManagementSystem>
Developed IMS, an Installment Management System, from the ground up using Angular and ASP.NET Core Web API. Integrated Hangfire, Hubtel (SMS), and Paystack to automate notifications and payment collection. Implemented webhooks for real-time payment processing, designed admin dashboards to flag due/defaulted payments, and added insightful business metrics and table filters to enhance user experience and decision-making.

Trybz React.Js (JavaScript) <https://mytrybz.com>
Contributed to Trybz, a platform for closed residential communities, by developing admin features using ReactJS, aligning closely with UI/UX teams, and enforcing strong security and best practices to ensure user data protection.

Legal Connect Angular (Typescript) <https://legalconnectonline.com>
Contributed to Legal Connect, a platform connecting clients with legal professionals. Used Angular and TypeScript to build responsive, high-performance admin features, with a strong focus on user experience and engagement.

MChudo Angular (Typescript) <https://www.instagram.com/mchudo.ke>
Contributed to MChudo, a fintech app for streamlined financial transactions. Led the frontend team using Angular and TypeScript, developed responsive layouts, and ensured cross-platform performance. Collaborated with backend engineers to integrate secure APIs, enforcing strict security protocols for data protection.

Surfwisely Angular (Typescript) <https://surfwisely.com>
Worked on Surfwisely, a gamified cybersecurity education platform, by building interactive UI components and a seamless learning interface. Collaborated with designers and implemented Single Sign-On (SSO) for improved user access and security.
